Personal Style I Assessment Report

Candidate: XXXXXXXXXXXX

Username: XXXXXXXXXXXX

Date: XXXXXXXXXXXX

Sample Report

The following pages represent a report based on the results of a psychological assessment. The profile presented below summarizes key results in each area compared against general population norms (indicated by the descriptors Low, Below Average, Average, Above Average, and High) and with norms for high performers in the type of job for which the candidate is applying (indicated by the shaded areas). The candidate's score is indicated by the diamond symbol : ◆

	Low	Below Average	Average	Above Average	High
Assertiveness				◆	
Conscientiousness			◆		
Emotional Stability / Resilience				◆	
Extroversion			◆		
Integrity			◆		
Openness			◆		
Optimism/Enthusiasm			◆		
Teamwork				◆	
Tough Mindedness				◆	
Work Drive				◆	
Overall Cognitive Aptitude					

Cognitive Aptitude Assessment

Compared to general adult norms using standardized tests which were validated for a wide range of positions, we estimate John's overall level of general intellectual aptitude to be in the **80-89 percentile** range. His individual aptitude levels are:

Abstract Reasoning 70-79%ile

Numeric Reasoning 70-79%ile

Verbal Reasoning 80-89%ile

John has a high level of general cognitive aptitude. He can learn new information quickly, solve complex problems efficiently, and be able to handle a heavy information-processing load on this job.

Explanation of Cognitive Aptitude Scores:

The aptitude scores in this section reflect percentile rankings -- not percent correct on the test. With percentiles, the average is the 50%ile. Half of the people score below this score and half score above it. As another example, if a person scores 80-89%ile on a specific test in this report, it means that they scored as well as or better than 80-89% of the norm group, but not as high as 11-20% of the norm group.

The **Overall Cognitive Aptitude** is an average of the separate aptitude sections given to this candidate.

The lower the Overall Cognitive Aptitude score, we predict that the candidate will have difficulty learning new information and making decisions. For example, if they are well experienced in their occupation, they may be able to continue to perform well practiced tasks adequately, but have difficulty learning new things. As such, they will need additional training time and more support from supervisors. People who produce lower Overall Cognitive Aptitude scores generally prefer tasks that call for specific responses rather than ones requiring insightful solutions. They are also slower in processing information and are often easily overwhelmed by complex problems, especially ones they have not dealt with before.

The higher the Overall Cognitive Aptitude score, the more we predict that the candidate will learn quickly, pick up a lot of new information on their own without needing to be trained, handle a large information load easily, make decisions in an efficient manner, and show a great deal of insight about how to solve new and complex problems.

INTERVIEW QUESTIONS

After reviewing the assessment results for this candidate, you may want to conduct a structured interview to further explore and clarify some specific concerns. The interview questions listed below reflect areas of concern raised by the assessment results. You should keep asking questions until you have gained confidence in your assessment of the candidate. You can use some or all of these questions when interviewing the candidate. You will probably want to customize these questions to best fit your style and what you already know about the candidate as well as the job for which s/he is being considered. Most of these are behavioral description items which ask the candidate to describe specific behavior on the job. Some additional probes which you might want to use with individual questions are:

- * When did this take place?
- * What factors led up to it?
- * What were the outcomes?
- * What did others in the organization say about this?
- * How often has this type of situation arisen?

INTEGRITY

- What would you do if you discovered that a coworker had been taking home office supplies without permission and without telling anyone?
- Under what conditions would it be acceptable to ignore or bend a company rule or policy?
- Describe what you would do if your boss asked you to keep quiet about some data he or she was falsifying for the annual company report.
- Under what circumstances would it be OK to claim a sick day (even though you were not sick) to deal with a personal problem at home?

TOUGH-TENDER-MINDED

- Describe a time when you made an important decision based primarily on an objective analysis of facts and data. (Compare the candidate's answer on this question with answers to the next question in terms of level of detail and enthusiasm.)
- Describe a time when you made an important decision based on your personal feelings, values, and intuition.
- Describe a situation where you dealt with an employee (or peer) who was consistently negative in meetings or when interacting with other employees. What did you do? What were the results?
- Describe a time when someone at work responded emotionally to something you said or did. How did you respond? What was the result?
